

A grayscale photograph of a patient's face, partially obscured by a white medical mask or device, serving as a background for the header.

## PATIENT CLINICAL WINDOW

Clinical Tool Set is a graphical application tool to be used in conjunction with our Clinical Data Repository. CTS allows you to easily view patient charts, place orders, and print records from. You will be amazed at how quickly you can access clinical information using CTS. Fifteen options allow individual users across to the information they need most. Patient lists can be viewed by responsible care giver, nurse station or facility.
